Traditional Gates

- Custom range of gates available
- Made to suit a wide variety of properties in durable aluminium
- Powder coated in your choice of colour
- Choose from swinging, sliding or automated
- Stay timeless - there's a reason it's called 'classic' design

Panel Gates

- Architectural design ensures strong yet subdued aesthetic
- Built-tough dependability and durability
- When you want (or need) total privacy from neighbours
- Perfectly compliment garage doors and other similar design features
- Ideal for both residential and commercial applications

Louvre Gates

- Because first impressions last
- Bold, beautiful and adaptable in aesthetic look
- Protect privacy without compromising style
- Ideal for both contemporary and traditional homes
- Powder coated in your colour choice, swinging, sliding or automated

Fresno Gates

- Delivering equal amounts privacy and personality
- Obscures view for added privacy
- Gaps for slats can be customised to suit the application light permeable or not
- Sliding gates have hidden wheels to give a low profile finish

TGV Gates

- Low-maintenance aluminium tongue and groove fabricated, powder coated and ready to install
- Matches perfectly with wooden paling fences and solid walls
- Can be horizontally or vertically mounted
- Light in weight but heavy-duty in strength, won't warp or rot like timber

Laser Cut Gates

- Create a one of a kind gate with a precision cut design
- Privacy without compromising individual style
- Bold, beautiful and totally customizable
- Low maintenance aluminium

Automation

Urban Group NZ have partnered with quality, automation manufacturers to give you the product depth for every scenario. These Italian manufacturers are committed to providing innovative products with the highest level of quality and are chosen as they manufacture automation products "in-house".

Our wide range of products means that you will have a solution fit for purpose for your project.

Features:

- Encoder technology to provide obstacle detection for an enhanced level of safety
- Now with the flexibility to operate gate by smartphone "app"
- Compatible to run on solar power systems
- Optional battery back up solution available to provide peace of mind in the event of power issues

V2 GO App is now available for free download

With V2 GO you can ...

- Remotely manage all your automations even when you are not at home. Not only check their status, but also control them! (Open, close, stop, activate the pedestrian opening, etc.)
- Enter your home without lifting a finger. By using the geolocation from your smartphone, V2 GO knows where you are and will open the chosen automation for you when you approach it, saving your time.
- Check at any time who comes and goes. The App lets you manage all your accesses by giving specific time slots to who you want, when you want.
- Set up programmed scenarios to be run anytime you want. Forget about your daily operations: with V2 GO you can open or close automatically your automations by day and time (For example: open the gate from 9.00 to 18.00, Monday to Friday)

Download the free V2 GO Application from the official stores (Google Play, Apple App Store)

To use the App, you need to connect your V2 control boards using the New ADI WIFI TOOL WF-01 code 161230
